

-DRAFT-

#### Proposed Mill Street Ordinance #

The City of Fountain City does hereby ordain as follows:

All vehicles hauling material from the US Corps of Engineers sand pile at the foot of Mill Street shall be subject to a load limit of one (1) cubic yard of material. Any vehicle hauling material in excess of one (1) cubic yard of material will be charged \$.30 per cubic yard of material over the one (1) cubic yard limit. Payment to the City of Fountain City shall be due monthly (by the end of the month following the excess load hauling). Anyone not adhering to this ordinance will be subject to a fine not to exceed \$100 US.

#### Background Information:

This ordinance is designed to help build a fund for the maintenance of Mill Street. The hauling of sand from the US Corps of Engineers sand pile at the foot of Mill Street has caused damage to the road surface, leaving it in very poor condition.

A monitoring device will be installed at the corner where trucks enter and exit the sand pile area. Tapes would be reviewed monthly for non-compliance and a fine would be assessed for those not paying the required fee required for hauling material over the cubic yard limit.

The revenue will be placed in a fund to be used for Mill Street maintenance which will provide budget relief for the City.
